

Senior Developer/Application Architect (M/F), NL-Utrecht

WHO ARE WE?

Safelinq is a innovative, rapidly growing company in the mobile telecommunications industry, specialised in delivering Mobile Location Based Products & Services (MLBS). We deliver peace of mind for our customers through the design, manufacture and distribution of converged GSM/GPS products and related Web-based services in the personal safety and mobile asset security fields.

Our clients vary from Network Operators, MVNO's, mobile distribution companies and specialist local partners. Safelinq is an international organization with its operational head office in Utrecht, The Netherlands.

We currently have licensed operations in 7 countries throughout Europe and Africa.

The Safelinq mentality can be described as entrepreneurial, enthusiastic, hands-on with the aim for success. Safelinq is managed in an informal way by its directors and founders.

A new position has been created, and we are looking for a

Senior Developer/Application Architect (M/F) reporting to the Operations Manager - fulltime

that can capably come into a fast growing business with global operations in different countries. Your position will be responsible for architecture, development, expansion and adaptation of the Safelinq service platform.

A key part of your role will be in technical design and development of new and improved services, which must be implemented taking into consideration the huge scale they will be used in.

This opportunity offers the unique possibility for a talented professional with a winners mentality who wishes to be very hands-on and 'make a difference' to be a part of a fast growing company in its field.

WHAT WILL YOU BE DOING?

Tasks and responsibilities:

- Define and maintain the overall architecture of the Safelinq platform.
- Supervise all new client Implementations
- Lead the Technical Development Team as a "working foreman"
- Together with the project manager, develop and implement new services
- From a technical perspective communicate with 3rd party vendors in Europe and Asia
- Implement and maintain a high level of quality control within the Technical Development Team

PROFILE OF THE SUITABLE CANDIDATE:

PERSONALITY:

- Minimum of five years working experience in a development/architectural role
- Proven ability to work unsupervised and autonomously to deliver against key business objectives
- Preferably International experience
- Able to inspire colleagues, able to build excellent relationships
- Self supporting with a pro-active attitude
- Ability to work in a remote team environment
- Ability to travel up to 5-10% internationally in due course
- Strong result orientated, ambitious, team player
- Able to work under pressure
- Strong personality, convincing power, no nonsense, common sense
- Excellent communication skills in English. Dutch and an other foreign language such as German, Spanish or Italian is preferred.
- Good knowledge of the mobile industry, value added services, GPS and Location based services preferred.
- Strong development skills in C++, MySQL and PHP(5)
- Affinity with Unix environments

Education

- HBO or WO degree

WHAT DO WE HAVE TO OFFER?

An interesting role in a unique and very dynamic company. A professional, informal working environment where initiative is appreciated. A flat organisational structure with enthusiastic colleagues who are focused on success through team effort. Some International (and Inter-continental) travel will be required.

An appropriate remuneration package will be provided for the right candidate.
